Summary

Full stack developer with two years of experience building responsive React and Next.js interfaces, Node.js/Express APIs, and MySQL/MongoDB backends. Experienced in deploying on AWS using CI/CD with GitHub Actions and containerized deployments on Kubernetes.

Skills

Frontend : React.js, Next.js, TypeScript, Tailwind CSS, Framer Motion, Three.js, HTML, CSS
Backend : Node.js, Express.js, REST APIs, MySQL, MongoDB
Cloud & DevOps : AWS (EC2, EKS, S3, IAM), Docker, Kubernetes, GitHub Actions
Tools : Git, GitHub, Postman, VS Code, Linux

Experience

Full Stack Developer **February 2026 – September 2026**
Kenz Innovations Pvt Ltd, Hyderabad (On-site) *Stack Used: React.js, Node.js, Express.js, MySQL, Docker*

- Built **responsive React dashboards from Figma designs** for three AI-powered applications, integrating REST APIs for dynamic backend data.
- Integrated **SignalWire and Twilio into AI SaaS applications** for voice and communication features.
- Developed **Backend APIs with Node.js, Express.js, and MySQL.** built two business websites with lead-capture backends for the marketing team.
- Worked with the DevOps team on **Docker based development** environments and deployment workflows.

Frontend Developer **October 2025 – April 2026**
Tektronix Technologies Pvt Ltd, Remote *Stack Used: Next.js, TypeScript, Tailwind CSS, React.js, Git*

- Built **reusable, responsive components in Next.js, TypeScript, and Tailwind CSS**, including a video carousel, Blogs and News sections, and an Access Control Ecosystem page.
- Optimized **SEO metadata**, across service pages.

Full Stack Developer **November 2024 – September 2025**
IntenCode pvt ltd, Hyderabad (On-site) *Stack Used: MySQL, Node.js, React.js, Express.js*

- **Added animations and transitions with GSAP and Framer Motion**, reducing bounce rates by 25% across devices.
- Implemented **form handling, data validation, and optimized database queries** in a React/Node/SQL stack.

Projects

Sandbox Orchestration Platform | *Kubernetes (EKS), Docker, S3, IAM, NGINX Ingress, Skaffold* **GitHub**

- Built a **Kubernetes-based sandbox orchestration platform** on **Amazon EKS** to provision isolated, multi-container development environments with **WebSocket-based terminal access** and live **React/Vite previews**, optimizing environment startup time.
- Automated container image builds and deployments using **Docker and Skaffold**, exposing individual sandboxes through **NGINX Ingress** with dynamic subdomain routing.
- Implemented persistent workspace storage using **AWS S3**, leveraging **init containers** to restore workspace data and **sidecar containers** for continuous file synchronization.
- Secured the platform using **Kubernetes RBAC, Secrets, and least-privilege AWS IAM policies**; troubleshot networking, image-pull, and initialization failures using **kubectl, logs, and events**.

SearchGPT | *MERN Stack, Gemini API, GitHub Actions, AWS EC2* **GitHub**

- Developed a **full-stack AI-powered chat application** using **React.js, Node.js, Express.js, and MongoDB Atlas**, integrating the **Google Gemini API** to generate context-aware responses.
- Automated build, testing, and deployment workflows using **GitHub Actions**, deploying the application on **AWS EC2** with managed environment variables.
- Designed and implemented modular **RESTful APIs** for processing user requests and AI-generated responses, following scalable backend architecture principles.

Education

B.E. Computer Science Engineering **Graduated: 2025**

Osmania University, Hyderabad
